Art Unit: 1772

1. Applicant's arguments with respect to claims 1-2, 6-11 and 16-17 have been considered but are moot in view of the new ground(s) of rejection.
2. Applicant's election with traverse of group I in Paper No. 7 is acknowledged. The traversal is on the ground(s) that no under burden would be placed upon the examiner to consider each of the pending claim of group II. This is not found persuasive because as disclosed in the last Office Action, it was shown that since group II, claims 12-15, are unrelated and hence, is a burden to the examiner as the area of classification is distinct from that of group I.

The requirement is still deemed proper and is therefore made FINAL.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

4. (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-2, 6-8 and 16-17 are rejected under 35 U.S.C. 102(b) as being anticipated by English abstract of Japanese: 4-319433.

The English abstract relates to a substrate layer of steel, an intermediate of foaming resin containing layer and a skin layer of thermosetting resin point. The substrate is metal. The adhesive can comprise epoxy with foaming resin sheet. The epoxy containing adhesive is a thermoset adhesive which expands upon heating. The thermoset skin layer is the outer layer.

The intended use phrases such as "capable of" have not been given any patentable weight because said phrases are not found to be positive limitations.

Art Unit: 1772

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 1-2, 6-11 and 16-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over English abstract of Japanese: 4-319433.

The English abstract, as discussed above, fails to teach that the laminate comprises additional layers of adhesive with foaming agent with substrate on the skin layer. It would have been obvious to one having ordinary skill in the art to modify the English abstract by providing said additional layers of adhesive with foaming agent and another substrate layer laminated on the skin adhesive layer, sequentially, based or duplication of parts.

8. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

9. Claims 1-2, 6-11 and 16-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, line 2, the phrase "an" is confusing. It is not clear if it refers to one of the resin or is it a typographical error?

Claim 10, line 1, the article "a" should be in upper case form -- A --.

Art Unit: 1772

Claim 2, the phrase "hide" is found to be indefinite because it is not clear it refers to what?

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nasser Ahmad whose telephone number is 703-308-4424. The examiner can normally be reached on Monday-Thursday from 7:30 am to 5 pm. The examiner can also be reached on alternate Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Harold Pyon can be reached on 703-308-4251.
